Backend: Python, FastAPI, PHP, Laravel, CodeIgniter 3/4, JavaScript

Frontend: React, JavaScript, HTML, CSS, Bootstrap

Database & DevOps: PostgreSQL, MySQL, Docker, AWS, Linux

Tools & Architecture: REST API, MVC, MVT, Git, Postman, Figma, Firebase

EDUCATION

Regal Jewellers | Full Stack Developer

May 20, 2026 – Present

- Develop ERP and business applications using Python, FastAPI, PostgreSQL, and REST APIs for jewellery retail operations.
- Build inventory workflows covering product transfers, box management, product/material handling, and branch-level operations.
- Implement invoice and billing workflows including draft invoices, line items, payments, refunds, tax transactions, and PDF generation.
- Develop repair management, checklist, reporting, and branch-based workflows with reliable status and inventory integration.
- Optimize complex database queries and backend services for performance, data accuracy, and scalable API responses.
- Integrate external services including SMS providers, background processing, and document-generation utilities.

Voyager IT Solution | Full Stack Developer

July 2025 – January 2026

- Developed and customized e-commerce and CRM platforms based on client-specific requirements.
- Integrated seller APIs for automated product, pricing, stock, and inventory synchronization.
- Developed REST APIs for mobile applications supporting product listing and user operations.
- Implemented backend business workflows, database changes, and API optimizations for web and mobile consumption.

Ignosi | Full Stack Developer

December 2023 – July 2025

- Designed and developed a custom ERP backend system supporting banking operations across multiple clients.
- Built billing, HR management, inventory, banking, reporting, and document-generation modules.
- Developed and optimized RESTful APIs for internal systems and mobile applications.
- Engineered NDH-3 and compliance reporting with complex data aggregation and regulatory-focused accuracy.
- Designed database schemas and optimized queries for financial transactions, reporting workflows, and API performance.

INDIRA GANDHI NATIONAL OPEN UNIVERSITY, TVM

2024 – 2026

Master of Computer Applications

UNIVERSITY INSTITUTE OF TECHNOLOGY, TVM

2020 – 2023

Bachelor of Computer Science

EXPERTISE
